About This Game

DYE is a challenging precision platformer where you help Hue rescue Pigments and defeat the nefarious Necrolights in order to restore color to the world! Jump, wall jump and float your way through 4 unique worlds with hundreds of challenges. Anyone from first-time platform gamers to experienced hardcore speedrunners will find a rewarding test of skill in saving Hue's homeworld.

!!! USE A CONTROLLER !!!

DYE has tight and responsive controls, and has been balanced around the use of a controller. Full keyboard support is available, but spare your hands and sanity (**seriously**), and use a controller. DYE has native support for all common controllers including Xbox, Steam, PS4, and most others.

What others are saying

- "The controls are so slick... its a difficult game but I feel like i have total control" - TGH_Plays - https://www.twitch.tv/TGH_Plays
- "The sounds, the music, the levels... it just all comes together so well" - Vellhart - <https://www.twitch.tv/vellhart>

What's In Each World?

Each world contains 9 regular levels, 4 challenge levels and 1 unique boss fight.

The 9 regular levels in each world of DYE are a series of challenges with Pigments along the way. Each Pigment you rescue will restore a layer of color, and rescuing all 5 in a level will restore all color to that level. The **Normal Mode** of the level will have checkpoints along the way, while the **Hard Mode** modifier will remove all checkpoints and add additional danger.

The 4 challenge levels in each world of DYE are filled with 100 "dust". You free a Pigment every 20 dust collected. There are no checkpoints in the challenge levels, and the Hard Mode version of these levels adds a restrictive time limit.

Its a good little game. I enjoyed it while travelling. You can finish the whole thing within couple of hours max.. There are demons, and they do have shotguns.

10/10. I just refunded this game. Got disappointed, there's no official tutorial.. This kind of thing is why I got the VIVE. Very professional and a delight to experience. More like this please!. I have loads of fun playing Genetic Disaster in co-op.

Characters are great and there is a tremendous amount of weapons. The game is not finished yet, some parts like audio require a bit more love, but overall it's already pretty polished.

It's a fun couch game, I recommend it.

there's a free version one :(A fun little casual puzzler. Good to pick up and play when you're in the mood for a quick game, or a mild brain teaser. It plays a little like a pipe puzzle game. Gets more difficult later on, with more advanced enemies, and has a quirky story. It's a good buy, especially if you can find it on sale.. Hmm - Rise of the Dynasty expansion seems to be bad value - worse looking world map, internet connection required for single player, and combat is now broken (can't hit small ships).

So far I've played myself up to Patrician on a new playthrough with the expansion, and I haven't seen any sign of the inland cities (or wagon trains!) - it feels like i'm still playing the old game, nothing is new :V

Oh, and the treasure hunting isn't worth it - paying at least 50k in Taverns (~5 map pieces) to get some flotsam worth less than 5k seems like a bad trade...

I hope Kalypso put out a patch fixing the broken stuff, until then I have to give this a thumbs down.... I enjoy psychological horror as a genre in any format so I knew I was going to be playing some of those types of games. Though I especially like the kind where you connect to the characters and have a more in-depth knowledge of these characters. The past is shown often in The Boogie Man on having a large impact for the characters present lives. Watching the ending I really liked the line "Because people don't always see the same as you", as you discover is apparent through the game. The only thing I found hard was completing the 'Boogie Wuz Here' achievement (which was hilariously annoying how long it took me to not find them but how to make it so I get the achievement) press spacebar on the red messages/graffiti! Didn't know this was technically 3rd in a series some I'm definitely going to play the others!. I kinda wish there were more games like this.. If there was a contest for worst of the worst ingame outfits that are dlc and cost money ,Shadow of the TR would win in,both hands down ! Worst outfits i ever bought , i mean it's the season pass , i regret it deeply , never buying a TR game season pass again.
